PRODUCTION

EXPEDITED SERVICE

CUSTOMER SUPPORT

GES *group*

SIX FUNDAMENTAL REASONS WHY WE SHOULD BE YOUR FIRST CHOICE

!: 5 - 10 Business day turn around
from order to delivery !

!: All encoder models backed by a
5 YEAR WARRANTY !

!: Unbreakable code discs produced in
house allow for flexible production !

!: Continuous product development using
newest technological advancements!

!: Rapid delivery available/No extra fees!

!: Niche Market Solutions!

Our purpose is to provide encoder
solutions tailored to your exact requirements.
We are committed to the success of all our
customers and partners.
With our global presence and company
network we service world wide markets.
Our Know-how, innovation & commitment
are the reasons for our success.

GESGROUP – WORLDWIDE

DEVELOPMENT AND PRODUCTION WITH FLEXIBLE MANUFACTURING PROCESSES

The GESgroup has many years of experience in the design, development and production of optical encoders. Since we specialize in the development and manufacturing of rotary encoders, we can provide our customers with solutions for a wide range of applications to meet their exact requirements while maintaining the highest standards of quality. We achieve this through our flexible development concept and well trained professionals that understand your needs and application demands.

The GESgroup is committed to the success of our partners, we achieve this through our products, technologies and employees.

Our product range includes Incremental, Absolute Single-Turn and Absolute Multi-Turn encoders. In addition to our standard product range we manufacture Atex Certified Explosion proof encoders, Wash-Down rated encoders and special encoders of all kinds. Most of our products are produced using our own in house made custom plastic code disc, which is why our encoders are extremely shock resistant and resistant to vibration

We are continuously working on technologies and processes to improve our products in cooperation with our customers.

TIME PROVEN AND TESTED EXPERIENCE

We work with you to design, develop and manufacture encoders that are specifically tailored to your needs and to your application. In order to provide you with the highest level of performance and reliability we familiarize ourselves with every aspect of your application, taking the necessary time to understand your requirements and to identify potential problems before they happen. When it comes to reliability and product performance we don't leave it to chance.
