# FSW PROTOTYPING

A close-up, high-angle photograph of a friction stir welding (FSW) process. A dark, cylindrical tool is shown in the center, moving along a metal workpiece. The tool's tip is creating a bright, glowing line of heat and light as it welds the metal. The surrounding metal surface is dark and textured, with some visible weld lines and debris. The lighting is dramatic, highlighting the intense heat of the welding process.
