Honesty

The honesty is valued because there are many things which are not honest. It is the most valuable property that we can always trust and be trusted. The spirit of Jeonghwa is to make the honest company.

Harmony

Harmony means that people live getting jointed together. when an employee has an ownership that he/she is the owner of company and all people become united. true and enormous power is made in Jeonghwa. The power will be shown. Jeonghwa is making this harmonizing company.

The world has been dramatically changed for last 35 years. But, there is a thing that does not change. Jeonghwa has not been changed and kept the only way for last 35 years based on its establishment philosophy that will achieve to be honest and harmonized company. Jeonghwa has been kept one way for interior works for ship. Jeonghwa can respond customer request at any time as it has technical ability accumulated for 35 years and good human resources. Jeonghwa does not satisfy this time and will continue making its best effort until customer satisfy.

BUSINESS DIVISION

R & D (Research & Development)

Jeonghwa is making its great endeavor to meet customer's needs with the best quality and design in continuously growing wooden furniture market for ship. According to order-based production, Jeonghwa carries out its R&D process to provide standardized furnitures and to meet all customer's needs with open mind. Based on deep understanding on normal furnitures and color as well as R&D process, it carries out research on new design and materials. Also, Jeonghwa is recently heading to high-class furnitures and interior area aiming cruise market.

Manufacturing (Processing & Assembly)

Wooden furniture for ship is manufactured by order-based with many item types and to be solid and strong against weather change which are different from mass produced normal furnitures. Therefore Jeonghwa uses the strictly selected quality materials and manufactures wooden furniture and various inventories installed in cabins. Jeonghwa is ready to satisfy various customer's needs in style, color and quality perspective by thirty employees in about 5,200m² of large factory.

Construction (Accommodation Joiner Work)

The cabin is to be place where crews can live comfortably and conveniently. Based on accommodation interior work experiences for 200 ships in STX shipbuilding Co., Ltd. It carries out various processes such as joiner working, panelling, furniture installation, fianl, etc by skilled human resource to create customer satisfaction.

Repair for ship (Remodeling, Insulation Works)

Based on thirty years experience in wooden working area such as cabin and deck outfitting work for various fishing boats and merchant ships. remodeling work, insulation work, fish tank work, and deck work, Jeonghwa has been kept long partnership with famous marine products company and carries out its construction to ensure quality and due delivery by professional woodworkers.

Yacht Interior (Construction, Furniture Installation)

As a company that is leading marine culture and pursuit customer's happiness. we are manufacturing yacht interior with a creative sprit and expanding a business division widely. As a partner with HYUNDAI YACHT, We have a performance record, and we prepare entering the world market.

LNG ship construction (LNG box, Invar Installation)

We were in full charge of constructing, inspecting and manufacturing the materials used for cargo holds as well as for living quarters(accommodation area) of LNG carriers.
