

SANIBACT is a highly concentrated disinfectant **Presidio Medico Chirurgico (Reg.n.20145)** effective against viruses, germs, bacteria, fungi and mould. Its high concentration allows disinfecting large surfaces with very little product. In fact, **with only 1 litre of Sanibact, you obtain 25 litres of ready-to-use disinfectant**.

It acts in just five minutes ensuring, with a simple gesture, a deep purification of the environments. It does not release odours or aggressive chemical residues. It can be used in total safety for disinfection of any type of surface (roads and pavements, handrails, handles, turnstiles and seats, tables and desks, keyboards and monitors, push-buttons, drink and snack machines, surfaces in contact with food etc.) and for the sanitation of evaporators, ventilation ducts and AHU.

SaniBact

thanks to its formulation based on 3 active substances that work together.
