

ENDFORMING MACHINE

NUMAFORM 70

100% ELECTRIC

Numaform 70 is a fully electric end forming machine.

It is shown here integrated with a Robomac 216 (or an FTX 16 also possible).

Suited for wire diameter up to 16mm.

This configuration allows end forming of parts within the cell, without needing manual handling or robotic integration.

MAIN FEATURES

- Fully electric, low power consumption
- Compact, robust
- 4 position, fast end-forming tool changer
- Suited for copper, aluminum, steel, stainless steel, brass, titanium...
- User friendly HMI
- Mounted on a 1300mm (51.2") slide rail for easy positioning
- Working force : 70 T
- Clamping force : 100 T
- Horizontal stroke : 250mm

OPTION

- Threading unit
- Easy integration into automatic cell
- Continuous lubrication

DIMENSIONS (STAND-ALONE)

- 3730x2210x2880mm
- 147x87x113"

WEIGHT

- 9000 kg
- 19842 lbs
