

Diaphragm seal for Pressure Instrument

Model: P790 series

Spec. sheet no. **PD07-10**

Service intended

P790 series diaphragm seal are suitable for conditions where the process medium can cause corrosion to the instrument connection and the pressure sensing element, which the process medium contains suspended solid particles are viscous and be closed. It is also suitable for where the process medium can freeze or solidify the internal parts of the instrument and where the medium requires flushing from the system to prevent contamination.

Design

Instrument welded diaphragm with threaded process connection, require hydraulic fluid to transmitter pressure to instrument.

Filling liquid

Silicone oil

Working temperature

Ambient : -20 ~ 65 °C

Fluid : Refer to filling liquid reference table

Diaphragm material

Diaphragms are available in many corrosion resistant materials. Compatibility of selected material and process fluid should be determined by the user

Temperature effect

Accuracy at temperature above and below the reference temperature (20 °C) will be effected by approximately $\pm 0.5\%$ per 10 °C of full scale

Standard features

Upper flange (Gauge side)

Stainless steel (304, 316), Titanium, Monel

Capillary

Capillary : Ø3.0 mm, 316L

Flexible tube : Ø7.5 mm, 304, PVC coated

Diaphragm material

Stainless steel(316L)

Hastelloy C-276, Titanium,

Tantalum, Monel

Pressure connection

Thread type : PT, PF, and NPT others feasible

Flange type : ANSI(ASME), JIS or other standard

Note

PTFE lining is available up to 7 MPa (Coating)

* Only available with thread connector type of P791, P792

** In case of P792, thread connector type shall be use gauge union (A020 series). Refer to figure A.

Vapor pressure vs Temperature

* Code "F" - Silicone oil

Temperature (°C)	Pressure (Pa)
228	11
244	25
263	84
277	155
380	13332

Filling liquid reference table

14th character

Code	Application	Filling liquid	Temperature range (°C)	Remark
A	Standard	Silicone oil, 10	-30 ~ 150	
B		Silicone oil, 50	-30 ~ 250	
C	Sanitary and Food Service	Mineral oil	-30 ~ 200	
D	Oxygen and Chlorine Service	Halocarbon	-40 ~ 200	
E	Low Temperature Service	ANDEROL® 423	-50 ~ 150	
F	High Temperature and Vacuum Service	Silicone oil	-30 ~ 315
