1. PRECAUTIONS

1.1 Important Safety Instruction

- Read these instructions.
- Pay attention on all the warnings.
- Follow all instructions.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not disassemble or insert foreign objects.
- Do not install near any heat sources such as radiation, heat registers, stoves, or other apparatus. (Including amplifiers) that produce heat.
- Do not aim the camera at the sun or any other strong light source.
- Do not install the camera in intermittent lighting environments.
- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- Installation should be done only by qualified personnel and conform to all local codes.
- Installation should be done in a place strong enough to hold it.
- Use only installation methods and materials capable of supporting four times the maximum specified load.
- It is designed for indoor use only and it must not be installed where exposed to rain and moisture without additional outdoor housing and bracket.
- To prevent damage from water leakage when installing a mount outdoors on a roof or wall, apply sealant around the bolt holes between the mount and mounting surface.
- These instructions are for use by qualified service personnel only. To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.
- Only use replacement parts recommended by manufacturer and these instructions.
- Please contact the manufacturer when there is a problem with a lithium battery that is built into the product. In the case of a lithium battery, which is built there is a danger of explosion when leaving the product at high temperatures.

2. GETTING STARTED

2.1 Unpacking

The following parts are supplied with the outdoor speed PTZ system.

<Figure 1. package Components>

2.2 Part name

2. 3 DIP Switch Setting

Before start up the camera, set the protocol and camera address and termination set with dip-switches and click-switches as shown in the below diagram.

1.Set the camera address (ID)

Open the top cover of the product to set camera address.

Address switch

* ID setting is 1~255 available

S1

S3

S4

S1 : 1-digit number of address

S3 : 10-digit number of address

S4 : 100-digit number of address

Ex) S4 = 1

S3 = 2

S1 = 8

The ID number is 128.

2. Protocol, Baudrate, Camera setting

1	2	3	PROTOCOL

3.Set the termination On/Off

ON : Terminated
OFF : Not terminated

The device which is connected at the end of the line must have the cable communication terminated. Without proper termination, there is potential for control signal errors.

The product have the cable communication terminated by setting the appropriate dip switch.

2.4 Cable connection

2.4.1 Power/Data communication cable connection

2.4.2 RS-485/RS-422 Connection

RS-422/485 connection

The PTZ can be remotely controlled by an external device or control system, such as a control keyboard or DVR, using RS-485 half-duplex, RS-422 duplex or simplex serial communication signals. Connect marked TRx+, TRx- to Tx+ and Tx- of the RS-485 control system.

If control system is RS-422, connect Tx+, Tx- of controller to Rx+ and Rx- of the PTZ Camera series. And also connect the Tx+, Tx- to Rx+, Rx- of the control device respectively. Total length of the cable for communication should not exceed 1.2Km.

2.4.3 SDI Output connection

Connect the SDI out (BNC) connector to the monitor or video input of DVR. Video cable and RS-485/422 communication cable are not provided in this product's package.

2.4.4 Network Lan connection(IP Type)

Used to connect the LAN cable.

Do not connect the AC24V power terminal to the communication terminal.

- Power Terminal: 2PIN
- Com Terminal: 4PIN

3.Installation

- The following steps of installation and connection work should be done by qualified service personnel or system installers and should conform to all local codes.
- Be sure to switch the camera off before installation is completed.
- Do not install the camera near the air outlet of an air conditioner.
- Before installation, set the system with Dip switch on the back side of the mechanism part, and assemble the mechanism and housing according to the below instruction

3.1 Installation

Attach the provided wall bracket rubber to a wall bracket as shown in the below picture.

Set the mount to the wall bracket by turn it to clockwise.

* Fix the socket into the ceiling pipe when install the ceiling bracket. The socket is included in the accessory package.

Set the mount to the ceiling bracket by turn it to clockwise.

Push the knob of mount and pull down.
Connect the cable. (See the page6)

After connecting the cable, set the mount in the proper position and fix the 2 screws (M4*8)

OPEN

CLOSE

(Turn the body to clockwise)

1. Connect the safety loop on the body and mount back side.
 2. Align the arrow mark in the body and mount.
 3. Fix the body by turn it to clockwise.
- * Please check the direction of connector in the camera body and mount.

Fix the provided mount screws to the PTZ camera tightly.

※ Fix the bolt tighten not to make a room between combinatorial parts to avoid any water-leakage from outside.

SD CARD Insert/Remove

* IP Model only

Prepare the body with the mount removed.

Loosen the bolts and safety hooks fastened to the housing cover.

Lift the housing cover up and detach from the body.

The opposite cover of the wiper position must be removed.

Loosen the bolt on the left side cover.

Remove the left side cover from the body that released the bolt.

Slide the SD CARD in the direction of the arrow to insert/remove it.
(Product SD-CARD MEMORY always included)

***The assembly proceeds in reverse order of this description.**

※Precautions※

1. Work in a place away from moisture and water.
2. To prevent static electricity, wear gloves or work after grounding.
3. When reassembling, check that the waterproof rubber of the housing is in place before assembling.

4. MAIN SETUP MENU

4.1 Initialize

When the device is powered on, you can check the address, version, protocol and video setting values.

This function enables to locate the camera to specific position automatically if operator doesn't operate the controller for a while.

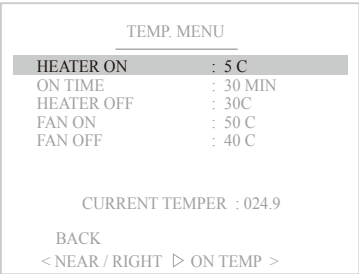

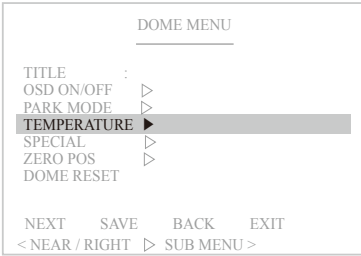

- ON/OFF : Select ON/OFF
- TIME : Select 10 sec~1 HOUR
- MOTION : Set PRESET / TOUR / GROUP / SCAN / PATTERN / HOMEPOS
- NUMBER
 - PRESET : 1~255
 - TOUR : 1~8
 - GROUP : 1~6
 - SCAN : 1~8
 - PATTERN : 1~4

4. 3. 4 TEMP MODE

It shows you the current temperature and you can also set the value manually. The compulsory Fan & Heater operation is a useful function to remove humidity.

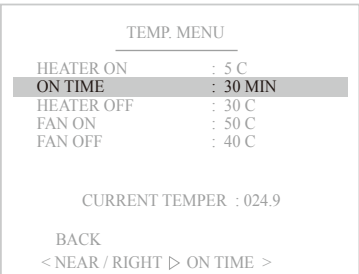

(1) HEATER ON

Set the operating temperature of the heater. (0~70℃)

Select :  or  Set ON : 

JOYSTICK NEAR JOYSTICK

Set OFF : 

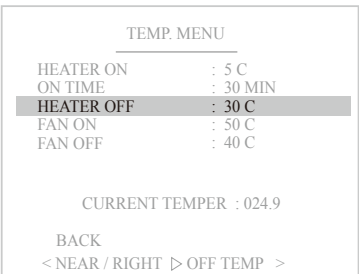

(2) ON TIME

Set the operating time of the heater.
- By 10min. (10~60 min.)

Select :  or  Set ON : 

JOYSTICK NEAR JOYSTICK

Set OFF : 

(3) HEATER OFF

Set the temperature of heater OFF. (0~70℃)

Select :  or  Set ON : 

JOYSTICK NEAR JOYSTICK

Set OFF : 

TEMP. MENU

 IR ZOOM (AUTO / MANUAL) = 248 + F1 Long Preset
 LIGHT (ON / OFF) = 252 + F1 Long Preset
 INFO (ON / OFF) = 255 + F1 Long Preset

5. SPECIFICATION

5.1 Mechanism Specification

5.1.1 MECHANICAL

- Pan : 360°Continuous Pan, 0.1° to 120°/sec (proportional to zoom)
- Pan Preset Speed : 250°/sec, $\pm 0.1^\circ$ Accuracy
- Tilt : -8°(352°) to 90°(188°) movement, 0.8°~80°/sec (proportional to zoom)
- Tilt Preset Speed : 250°/sec, $\pm 0.05^\circ$ Accuracy
- Weight : Approximately 6.8 Kg(MECHANICAL)
- Dimensions Set : 231(Ø) x 385(mm)

5.1.2 ENVIRONMENTAL

- Construction : Aluminum
- Ingress Protection : IP66 (Outdoor Housing)
- Operating Temp : Outdoor -40°C to 60°C (-40° F to 140° F)/ with 30W Heater
- Humidity : 0% to 90% (non-condensing)
- Fan operate : 50°C on , 40°C off
- Heater operate : 5°C on , 15°C off

5.1.3 FUNCTIONS

- Preset : 255 points, less than 0.1° accuracy
- Tour : 8 programmable
- Group : 6 group(Max.6 Tours are programmable in each Group)
- Scan : 8 (programmable speed and diagonal scan)
- Pattern : 4 patterns for 60 second.
- Area : 16 Area
- Alarm : 8 alarm
- Privacy Zone : 8 block with title (Mask)
- ID Address : Up to 255 selectable ID (Rotary switch)
- Data Communication Control : RS-485 / RS-422 / UCC(Only PELCO D / Baud 9600)
- Protocol : Multiple protocol (PELCO D/P, WTX, EZP)
- Baud rate : 2400, 4800, 9600, 19200, 38400, 57600, 115200 bps selectable

5.1.4 ELECTRICAL

- Power : AC21~26V 60Hz / 50Hz(Power adaptor not included)
- Consumption : Operation(5A) / MAX 6A
- Fan & Heater : 10 W / 30 W

5.1.5 USER CONNECTIONS

- Data communication connection : RS-422, 485 + / - Optional Control Data
- SDI connection : BNC
- Alarm Inputs : 8 Programmable
- Relay : 2 Dry Contact Output Rating: 2A @30VAC
