★ Rated flow stands for approximate flow rate when the pressure drop between inlet and outlet ports of the valve in fully opened condition becomes 0.3MPa{kgf/cm²} maximum at fluid's specific gravity of 0.85 and kinematic viscosity of 20mm²/s(98SSU).

Hydraulic Fluid

1. Fluid Types

Any type of hydraulic fluids listed in the table below can be used.

| Types of fluids | Specifications |
|-------------------------|--|
| Petroleum base oils | Use fluids equivalent to ISO VG32 or VG46. |
| Synthetic fluids | Use phosphate ester or polyol ester fluid. When phosphate ester fluid is used, prefix "F-" to the model number because the special seals (fluororubber) are required to be used. |
| Water containing fluids | Use water-glycol fluid. |

Note: For use with hydraulic fluids other than those listed above, please consult your SEWON representatives in advance.
Water in oil emulsion type fluids can be used for restrictors and one way restrictors.

2. Recommended Viscosity and Oil Temperatures

Use hydraulic fluids which satisfy the recommended viscosity and oil temperatures given below.

| Name | Viscosity | Temperature |
|---|--------------------------------|-------------|
| Flow Control Valves Flow Control and Check Valves | 20~200mm ² /s {cSt} | -15°C~+70°C |
| Restrictors One Way Restrictors Throttle Modules Throttle and Check Modules Needle Valves | 15~400mm ² /s {cSt} | |

3. Control of Contamination

Due caution must be paid to maintaining control over contamination of the hydraulic fluids which may otherwise lead to breakdowns and shorten the life of the valves. Please maintain the degree of contamination within NAS 1638-Grade12. Use 25μm or finer line filter.

Needle Valves

Used as stop valves for pressure gauge lines and small-capacity line. Also can be used as restrictors for regulating flow rates in pilot lines.

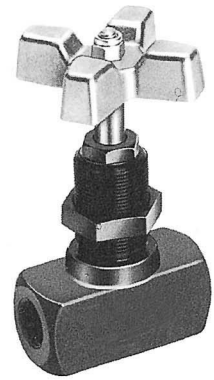

Ratings

| Model Numbers | | Max. Flow L/min | Max. Operating Pressure MPa {kgf/cm ² } | Approx. Mass kg |
|---------------|------------|--------------------|---|--------------------|
| In-line Type | Angle Type | | | |
| GCT-02-31 | GCTR-02-31 | ★ | 35 {357} | 0.34 |

★ Depends on allowable pressure drops. See Flow vs. Adjustment Revolutions characteristics and Pressure Drop at Full Open Characteristics.

Model Number Designation

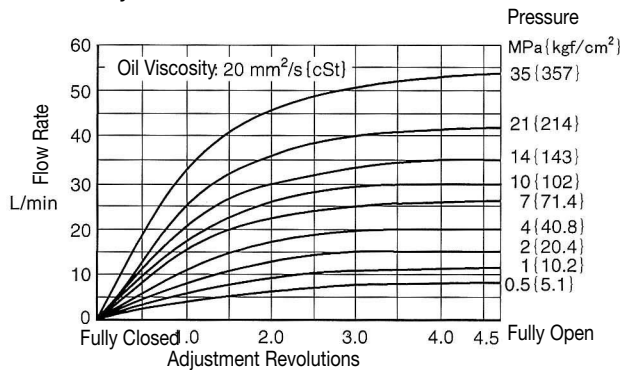

| GCT | -02 | -31 |
|---|------------|---------------|
| Series Number | Valve Size | Design Number |
| GCT : In-line Type Needle Valve, Threaded Connection GCTR : Angle Type Needle Valve, Threaded Connection | 02 | 31 |

Pressure Drop at Full Open

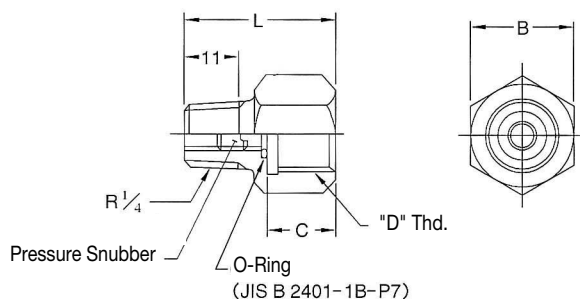

Adaptor

Used where pressure gauges are attached directly to needle valves. Equipped with pressure snubber for reducing harmful surges to protect pressure gauges.

Adaptors are not accessories to needle valves. Other than referring to the table below. For the models shown here, only Japanese standard specifications are available.

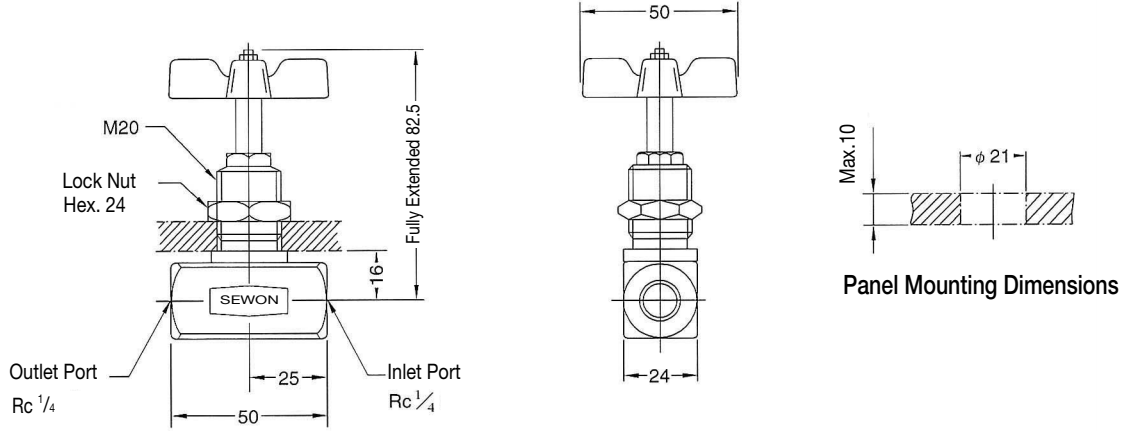

| Adaptor Type | Thread Size "D" Thd. | B | C | L | Approx. Mass kg |
|--------------|-------------------------------|----|----|----|-----------------|
| AG-02S | G ¹ / ₄ | 24 | 14 | 32 | 0.075 |
| AG-03S | G ³ / ₈ | 24 | 16 | 35 | 0.075 |
| AG-04S | G ¹ / ₂ | 27 | 18 | 37 | 0.08 |

AG-02S, 03S, 04S

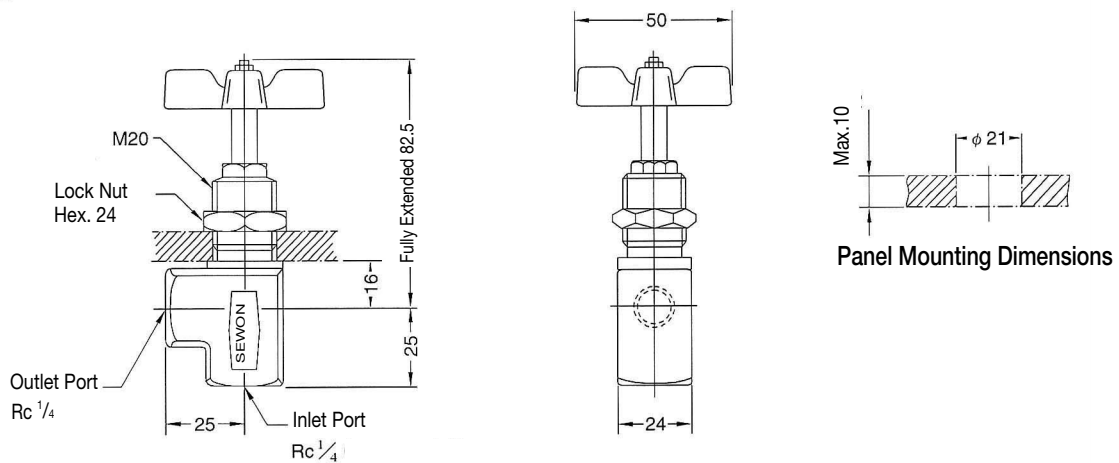

NOTE : The dimensions refer to the table above.

GCT-02

GCTR-02

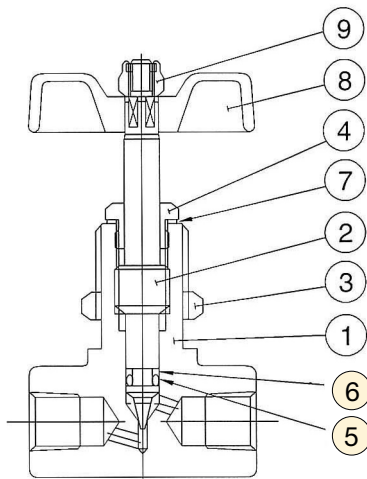

CAUTION

When making replacement of seals, please do it carefully after reading through the relevant instructions in the Operator's Manual.

List of Seals

GCT GCTR-02

| Item | Name of Parts | Part Numbers | Qty. |
|------|---------------|------------------|------|
| 5 | O-Ring | JIS B 2401-1A-P5 | 1 |
| 6 | Back Up Ring | JIS B 2407-T2-P5 | 1 |

Installation

Refer to the following procedures to fit the valve with a panel. Figure in a circle below is shown on the above drawing.

1. Remove the nut ⑨ then take off the handle ⑧.
2. Take off the nut ③.
3. Insert the needle valve to a panel hole.
4. Screw the nut ③ onto the valve and fix the valve with the panel.
5. Fit the handle ⑧ and fix it with the nut ⑨.

Needle
Valves

Flow Control and Check Valve

With a combination of throttle valve and check valve in one direction to control the flow through the bridge axis, the check valve in the opposite direction to the flow through the valve is free.

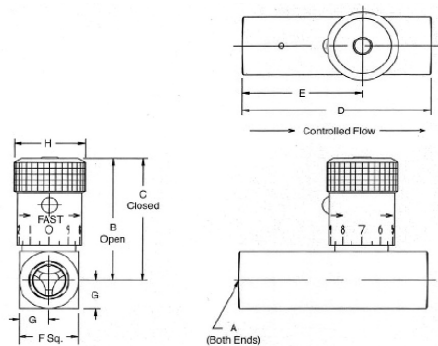

Ratings

| Max. Flow Rate | Max. Operating Pressure | Cracking Pressure | Available temperature |
|--------------------------|---|---------------------------------------|-----------------------|
| Refer to the table below | 200~800: 34MPa {347kgf/cm ² } | 0.039MPa {0.4kgf/cm ² } | -40℃ ~ 121℃ |

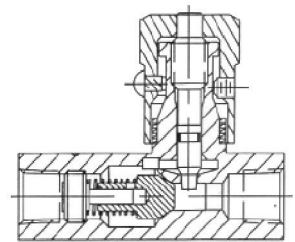

Model Number Designation

| SF | 600 | S |
|-------------------------------|--------------------------|----------|
| Series Number | Valve Size | Material |
| SF : SEWON FLOW CONTROL VALVE | Refer to the table below | STEEL |

Dimensions

| Model Numbers | Max. Flow L/min | Dimensions(mm) | | | | | | | |
