SIMBOLOGIA DATI TECNICI TECHNICAL DATA ICONS

GANASCE JAWS		Fissa Fixed		Mobile Movable		Intermedia Intermediate		Fissa con piastra singola Fixed with single plate		Fissa con piastra doppia Fixed with double plate
PIASTRE GANASCE JAW PLATES				Discendente Pull down		Piane Straight		Cambio rapido manuale Quick manual change		GRIP GRIP
POSSIBILITÀ DI POSSIBILITY OF		Serraggio di 1 particolare Clamping only 1 piece		Serraggio di 2 particolari Clamping 2 pieces		Montaggio sul fianco o in serie Side mounting or gang operation		Posizionamento & cambio rapido Quick change & positioning		Cubi-morsa Vise tower
PAGINE PAGES						Accessori & Ricambi Accessories & Spare Parts		Istruzioni corretto utilizzo Instruction for a proper use		Diagrammi forze di serraggio Clamping force diagrams

ELEMENTI MODULARI MODULAR ELEMENTS

Sono la parte mobile e la parte fissa della morsa Stadar sezionate e rese completamente indipendenti per ottenere una versatilità estrema.

Are simply standard vises sections, the movable section and the fixed one, which in this way result completely independent for an extreme versatility.

Gli elementi modulari **GERARDI** Vi permettono di ottimizzare i bloccaggi di pezzi particolarmente grandi, che richiedano le lavorazioni più gravose, sfruttando anche il piano della tavola della macchina come punto di appoggio. Gli elementi modulari sono sicuramente l'esempio (vedere applicazioni alle pagine seguenti) più lampante dell'estrema versatilità del sistema modulare Gerardi. La disponibilità di una vastissima gamma di composizioni (modulari) permette di realizzare con soluzioni standard anche gli allestimenti che credevate speciali

La morse **GERARDI** sono ormai considerate sinonimo di produzione ad alto livello tecnologico per l'accurata scelta dei materiali impiegati e per la precisione raggiunta anche nei minimi particolari. **Accuratamente rettificate** in ogni loro particolare ed ampiamente collaudate, consentono:

✓ una capacità di massimo rendimento della macchina / ✓ un forte carico di pressione / ✓ una maggiore potenza di taglio / ✓ esclusione totale di vibrazioni / ✓ minor usura dell'utensile / ✓ una più precisa lavorazione

La costruzione con un sistema di elementi componibili consente le più svariate possibilità di impiego e combinazioni in caso di necessità.

GERARDI modular elements allow you perfect clamping even of big workpieces which need the heaviest machining using the machine table as surface.

Modular elements are the best example of the extreme versatility of the Gerardi modular system. The availability of the broadest assortment program allows to build with standard solutions even the fixtures you thought special. They are a solution for a lot of applications and, with the many reference points available, a perfect complement or alternative to single or double vises.

GERARDI vises are manufactured under rigid quality control. Only the most suitable materials are used, and the accuracy of the even the smallest components is assured. As a result of the high standard construction Gerardi vises can maintain their accuracy under the most severe operating conditions. **Hardened and ground steel construction throughout allowing you maximum machine performance** with:

✓ bigger clamping power / ✓ bigger cutting performances / ✓ total exclusion of vibrations / ✓ lower tool wear
✓ higher precision during machinework

The modular design and the concept of interchangeability makes possible a wide variety of set up combination and solutions.

CARATTERISTICHE E VANTAGGI

- USURA INESISTENTE
- RAPIDITA' DEI SERRAGGI
- MODULARITA' & VERSATILITA'
- PRECISIONI $\pm 0,02$ mm
- RIGIDITA' & SICUREZZA
- DESIGN COMPATTO E MANEGGEVOLEZZA

Si rimanda a quanto esposto a pag. 1.4 e 1.5

(morse serie STANDARD)

TECHNICAL FEATURES and ADVANTAGES

- NO WEAR
- QUICK CLAMPING
- MODULARITY & VERSATILITY
- HIGHEST ACCURACIES $\pm 0,02$ mm
- RIGIDITY & SAFETY
- SPACE SAVING DESIGN & HANDY

See pag. 1.4 and 1.5 (STANDARD series vises)

1 RAPIDITA' DEI SERRAGGI

Grazie allo **scorrimento del gruppo di serraggio** nella guida della base (a cremagliera) fino in prossimità del pezzo da lavorare dove si adatterà automaticamente alla nicchia più vicina. L'operazione di serraggio si conclude agendo sulla vite di bloccaggio. Oltre a quello manuale meccanico, sono disponibili **4 ulteriori sistemi di serraggio** intercambiabili e indipendenti:

1 - Idraulici / 2 - Pneumatici / 3 - Idraulici manuali / 4 - Idraulici elettrici.
L'operazione è in termini di secondi.

1 QUICK CLAMPING

Thanks to the **clamping device sliding in the vise base slide** (compact rack type) till the proximity of the workpiece. The clamping is completed with the main screw. Besides the manual mechanic system, **4 further** interchangeable and independent **clamping systems** are available:

1- Hydraulic / 2- Pneumatic / 3- Manual hydraulic / 4- Electrical hydraulic.
The change needs only few seconds.

2 GANASCE FISSE RIPOSIZIONABILI

La ganasce fisse hanno la possibilità di essere posizionate sia con piastrine all'interno della base (come nelle foto), sia con piastrine che fuoriescono dalla base in modo da poter serrare anche particolari posizionati sul piano della tavola della macchina

2 FIXED JAWS with DOUBLE POSITIONS

Fixed jaw have the possibility to be positioned both with jaw plates inside the vise base (as shown in the picture) and with jaw plates externally from the vise base in order to be able to clamp even workpieces positioned on the machine table directly.

Art. 102

Art. 104

Art. 103

3 BASE VERSATILE

Slittone base (per Art.103 e 104) o elemento di prolunga (per Art.102) sempre previsti con chiavette di posizionamento longitudinali e trasversali per allineamento agli assi della macchina. Inoltre per le ganasce fisse sono sempre previsti 2 differenti posizionamenti per permettere alle stesse anche la possibilità di serrare pezzi direttamente appoggiati sul piano / tavola della macchina (vedi immagini pag. 3.6, 3.7)

3 BASE VERSATILITY

Vise bases (for Art. 102 and 104) or base extensions (for Art. 102) are always built with longitudinal and cross keyways in order to be aligned with the machine axis. Furthermore fixed jaws have always 2 different positions in order to be able to clamp even workpieces positioned on the machine table directly (see images on pages 3.6, 3.7).

4 FORI GANASCE PER APPLICAZIONI SPECIALI

Quattro fori filettati supplementari sopra le ganasce danno la possibilità di installare ganasce sovrapponibili per applicazioni speciali.

4 JAW HOLES FOR SPECIAL APPLICATIONS

4 extra tapped holes over the jaws for special Gerardi stack type jaw application

ESEMPI APPLICATIVI CON UTILIZZO ELEMENTI MODULARI

APPLICATION EXAMPLES USING MODULAR ELEMENTS

3

Esempio n°1 - Example #1

Particolari di grosse dimensioni posizionati su tavola macchina
Huge workpieces clamped directly on the machine table

Esempio n°2 - Example #2

Esempio n°1 - Example #1

Particolari di medie dimensioni posizionati sugli elementi modulari.
Medium size workpieces clamped on the vise sections

Esempio n°2 - Example #2

ESEMPI APPLICATIVI CON UTILIZZO ELEMENTI MODULARI

APPLICATION EXAMPLES USING MODULAR ELEMENTS

Art. 1 + Art. 51

Esempio n°1 - Example #1

Per realizzare una stazione mobile è sufficiente sfilare dalla morsa Art.1 il gruppo di bloccaggio Art.258 + la ganaschia mobile Art.127 ed inserirli in un elemento di prolunga Art.51.
In order to get a movable vise section it is enough to remove from vise Art.1 the blocking device Art.258 + the movable jaw Art.127 and to assemble them on an extension base Art.51

Esempio n°2 - Example #2

Elemento modulare fisso doppio (Art. 104) + 2 elementi modulari mobili (Art. 102)
Double fixed vise section (Art. 104) + 2 movable vises sections (Art. 102)

Elementi modulari montati su cubo a croce Art. 57
Modular elements assembled on cross cube type Art. 57

Tipo (grandezza) morsa / Vise (type) size

Art. 102

 Blocco tenditore completo di base.
 Movable jaw section and base assy.

DIAGRAMMI SERRAGGIO MECCANICO CON CHIAVE DINAMOMETRICA DIAGRAMS MECHANICAL CLAMPING WITH TORQUE WRENCH

GRUPPI DI SERRAGGIO MECCANICI

(Art. 258 e similari)

I diagrammi seguenti consentono di determinare le forze di serraggio ottenibili con le morse di varia grandezza (da 1 a 6), in funzione del momento applicato

MECHANICAL CLAMPING DEVICES

(Art. 258 and similar)

The following diagrams give the clamping force that can be obtained with each vise type (size 1 to 6) depending on the torque

ELEMENTI MODULARI TIPO 1 MODULAR ELEMENTS TYPE 1

Vite M12 - Passo 1,75mm
Screw M12 - Pitch 1,75mm

ELEMENTI MODULARI TIPO 2 MODULAR ELEMENTS TYPE 2

Vite TPN18 - Passo 4mm
Screw TPN18 - Pitch 4mm

ELEMENTI MODULARI TIPO 3-4 MODULAR ELEMENTS TYPE 3-4

Vite TPN24 - Passo 5mm
Screw TPN24 - Pitch 5mm

ELEMENTI MODULARI TIPO 5-6 MODULAR ELEMENTS TYPE 5-6

Vite TPN30 - Passo 5mm
Screw TPN30 - Pitch 5mm

NB: Alcuni fattori, come la lubrificazione, lo staffaggio, gli attriti ed altro, possono modificare i valori indicati fino a $\pm 10\%$.

Per un corretto utilizzo non superare i valori indicati nel grafico

Some factor as lubrication, clamping on the machine table, frictions and more can modify above values within a $\pm 10\%$ range.

For optimum operation do not exceed chart values.
