# GXC, GXV Submersible Sewage and Drainage Pumps

# **Materials**

Component	Material
Pump casing Casing cover Impeller Motor jacket Jacket cover	Chrome-nickel steel 1.4301 EN 10088 (AISI 304)
Handle	Polypropylene (with frame in AISI 304)
Shaft	Chrome-nickel steel 1.4301 EN 10088 (AISI 304)
Mechanical seal: upper lower	Ceramic alumina/Carbon/NBR
Seal lubrication oil	Oil for food/pharmaceutical machinery

#### Construction

Single-impeller submersible pumps in chrome-nickel stainless

steel, with vertical delivery port. GXC: with two-passage impeller. GXV: with free-flow (vortex) impeller.

Double shaft seal with interposed oil chamber.

# **Applications**

For clean and dirty water, also containing solids up to 35 mm grain size.

The GXV free-flow impeller construction is particularly suitable for liquids with a high solid content or with filamentous particles. This construction (with smooth surfaces in rolled-stainless steel and easy access for cleaning) is also suitable for certain uses in the food industry.

# **Operating conditions**

Liquid temperature up to 35 °C. Minimum immersion depth: 250 mm. Maximum immersion depth: 5 m. Continuous duty (with submerged motor).

#### Motor

2-pole induction motor, 50 Hz (n ≈ 2900 rpm). GXC, GXV: three-phase 230 V ± 10%; three-phase 400 V ± 10%;.

Cable: H07RN-F, 4G1 mm<sup>2</sup>, length 10 m, without plug.

GXCM, GXVM: single-phase 230 V ± 10%,

with float switch and thermal protector.

Incorporated capacitor.

Cable: H07RN-F, 3G1 mm2, length 10 m, with

plug CEI-UNEL 47166.

Insulation class F.

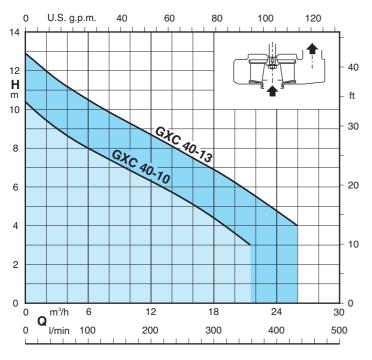

Protection IP X8 (for continuous immersion) Triple impregnation humidity-proof dry winding. Constructed in accordance with: EN 60034-1;

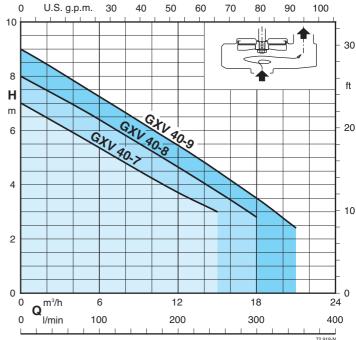

EN 60335-1, EN 60335-2-41.

#### Other features on request

- Other voltages. Frequency 60 Hz (as per 60 Hz data sheet).
- Other mechanical seal. Cable length 20 m.
- Motor suitable for operation with frequency converter.
- Three-phase pumps with incorporated float switch.
