

**Product : Moisture absorber**

**Job : Winter storage**

**Users : Pro**

The Express Shrink Wrapping moisture absorber is the ideal companion for any boatyard looking to enhance its winter storage operations.

This new easy-to-use product is just as effective as conventional 1 kg bags. It provides lasting protection (up to several weeks) and prevents mould and unpleasant odours. It does not leak and does not stain, making sure boats are stored in excellent conditions during the winter.

**The Express Shrink Wrapping moisture absorber prevents mould by removing excess humidity in the air.**

**Its action is 100% natural.**

It operates autonomously, requiring no batteries, power supply or connection of any sort.

One bag can be used for approximately 20 m<sup>3</sup>, according to the temperature and humidity of the space it is placed in.

**It needs to be replaced every two months.**

#### Applications

- Winter storage, caravans or the like.
- Packaging of corrosion-prone material.
- Specific containment jobs.

#### Technical characteristics

- Weight: 400 g / 0.88 lb
- Volume: 20 m<sup>3</sup>
- Duration of use: 2 months
- Bag formed of 2 films:
  - an opaque non-woven film that lets air through and keeps liquids in;
  - a PET film. Transparent PE that makes it possible to view the absorber's saturation level.
- Colour saturation indicator: when saturated, a "honey" colour appears evenly.
- Place the absorber on the transparent side, leaving the opaque side unobstructed.

**IMPORTANT: Read the user manual before use - For use only in sufficiently well ventilated rooms.**
