

STEEL CABLE CHAIN

Usage

Applied for various types of machinery and facilities such as Iron, steel manufacture, machining center, conveying machinery, automatic production facilities, industrial plant, cold rolling, rolling facilities.

- Type : SK70
- P : Pitch (70mm)
- Ls : Stroke
- KR : Bending radius
- UB : Loop projection
- LB : Loop length
- Ha : Safe space

(Dimensions in mm)

Bending radius	KR	75	90	125	145	200
Safe space	H	200	230	300	340	450
Moving height	Ha	210	240	310	350	460
Loop length	LB	515	560	670	735	910

Calculation of the chain length : travel distance 1/2 + Loop length

Material : S400, S45C, SUS304

Aluminum bar type

Standard type

Inner width of cable chain BK	100	125	150	175	200	250	300	350
Number of dividers	2	2	3	3	4	5	6	7
BST	86	111	136	161	186	236	286	336

Hole type

- Rounded type
- Slotted type
- Square type
- Customized type

Dmax X 38mm

dmax X 35mm

Amin 5mm

BSTmax X 350mm

STEEL CABLE CHAIN

SK 70

► Feature

- It is durable and ensures long life span as composed of steel cable chain and aluminum stay.
- Small sized 'Link Plate' is safely designed.
- As holes of stay are machined by customized type, it strengthens supporting power of cable holes.
- It is standardized cable chain which can be applied for all kinds of machinery such as conveying machinery, machining center and steel facilities.

Chain coupling

Cable chain guide channel

Load diagrams self-supporting length

Customers can select right model of cable chain by considering Load diagrams self-supporting length.

Weight per 1 meter (Kg/m)

SK 95

STEEL CABLE CHAIN

Usage

Applied for various types of machinery and facilities such as Iron, steel manufacture, machining center, conveying machinery, automatic production facilities, industrial plant, cold rolling, rolling facilities.

- Type : SK95
- P : Pitch (95mm)
- Ls : Stroke
- KR : Bending radius
- UB : Loop projection
- LB : Loop length
- Ha : Safe space

(Dimensions in mm)

Bending radius	KR	125	145	200	250	300
Safe space	H	318	358	468	568	668
Moving height	Ha	330	370	480	580	680
Loop length	LB	770	835	1000	1165	1320

Calculation of the chain length : travel distance 1/2 + Loop length

Material : S400, S45C, SUS304

Solid type

Standard type

Inner width of cable chain BK	100	125	150	175	200	250	300	350	400	450	500	550	600
Number of dividers	1	1	2	3	4	5	6	7	8	9	10	11	12

SK130

STEEL CABLE CHAIN

Usage

Applied for various types of machinery and facilities such as Iron, steel manufacture, machining center, conveying machinery, automatic production facilities, industrial plant, cold rolling, rolling facilities.

- Type : SK130
- P : Pitch (130mm)
- Ls : Stroke
- KR : Bending radius
- UB : Loop projection
- LB : Loop length
- Ha : Safe space

(Dimensions in mm)

Bending radius	KR	150	200	250	300	340	400
Safe space	H	394	494	594	694	774	894
Moving height	Ha	410	510	610	710	790	910
Loop length	LB	990	1140	1300	1460	1580	1770

Calculation of the chain length : travel distance 1/2 + Loop length

Material : S400, S45C, SUS304
