APT3500

Bottom Connection for Vertical Process Line

*Easy Installation,
Vertical Process line.
Industrial standard connection.
Not require additional
retrofitted Flanges or Adapters.*

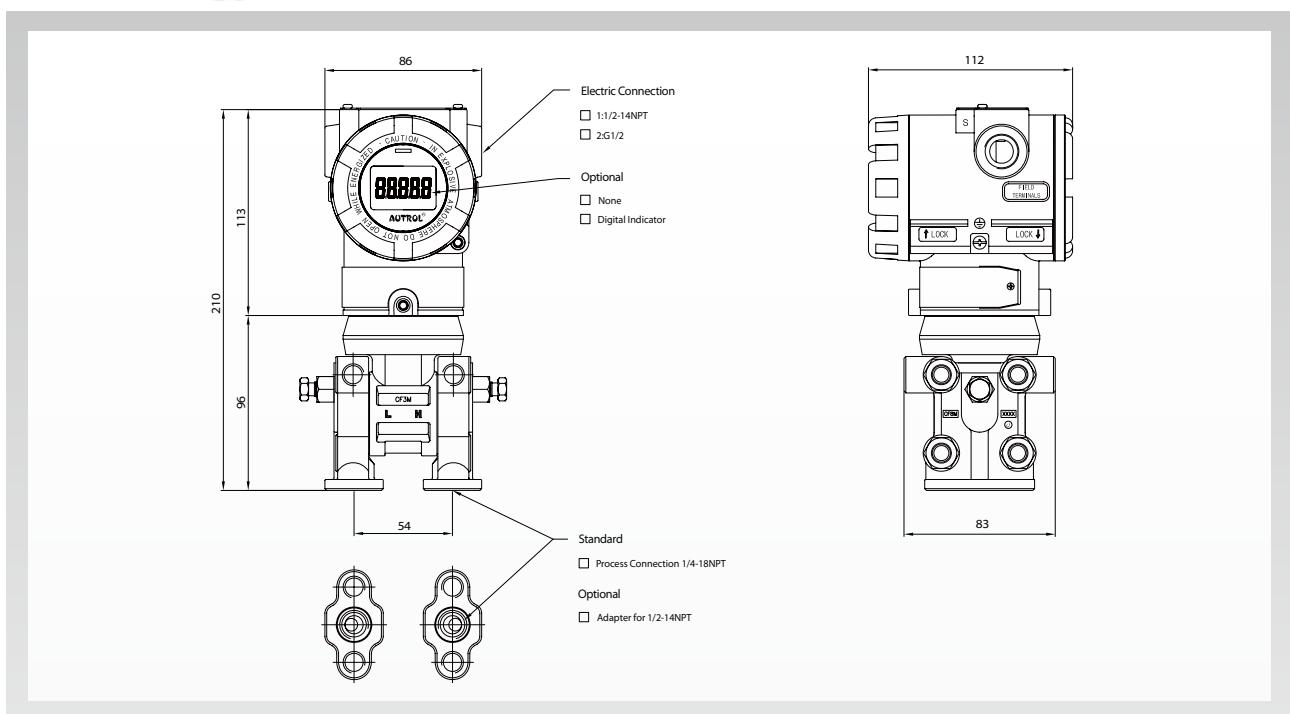

Background

Traditionally, some of applications require vertical installation such as flow application, orifice assemble line, special location and etc. The traditional connections may require additional flanges or adapters, which is inconvenience and additional charge. (Except changing size of process connection).

Advantage

Direct connection from vertical process line with manifold. And it is not required additional retrofitted flanged or adapter to connect vertical process line or assemble manifold because it has industrial standard size 54 mm between L & H process connection in the transmitter. Moreover, Manifold can be connected directly.
