

Odor Removal Treatment against Urine - Ready to use

Product Description

UKLIN is the ideal solution to eliminate the presence of smelling substances from many different surfaces. UKLIN has to be thought not as a perfume that can cover up bad smells, but as an efficient solution that is able to separate their source from the surface, by absorbing it in its molecules. UKLIN has actually been designed to neutralize the odor of urin (both animal and human). Thanks to its pleasant scent, UKLIN is perfect for internal applications. On the contrary, animals have a bad reaction to its smell: that is why UKLIN is able to break animals' annoying habits. UKLIN does not damage surfaces. It does not leave any kind of remainings either. Rinsing is possible, depending on the unpleasantness of the odor. Professional use product, read the instructions.

Features

- Suitable for cleaning entrances and passageways.
- Suitable for all surfaces (metal, plastic, wood, cement ...).
- Eliminates the unpleasant smell of urine.
- It has a repellent action but does not bother the animals.

Application

1. Dilute the portion you intend to use with tap water (the more odor is present and persistent, the greater the amount needed for elimination).
2. Apply the mixture with a dispenser or directly to the entire desired area.
3. Leave it on for a few minutes.
4. If a significant quantity of the product has been used, rinse quickly.
