FW7901-PVM
5MP Motorized Bullet

FW7901-PVM is a high quality Bullet type IP camera which is equipped with 6.82MP(effective pixel) Progressive Scan CMOS image Sensor. With the highest sensitivity Starvis sensor, It is especially superior in low light condition. As it supports simultaneous H.265, H.264 and MJPEG Video Compression, less network bandwidth and storage space required. It also delivers high quality video image at 15fps@5M(2592x1944) or 30fps@4M(2688x1520) in progressive mode.

• Tech Notes

Zero-configuration networking (zeroconf) is a set of technologies that automatically creates a usable IP camera network based on the Internet Protocol Suite (TCP/IP) when IP cameras are interconnected with other device or server. It does not require manual operator intervention or special configuration servers. Without zeroconf, a network administrator must set up network services, such as Dynamic Host Configuration Protocol (DHCP) and Domain Name System (DNS), or configure each computer's network settings manually.

IP filtering

The IP filtering enables you to control what IP traffic you want to allow into and out of your IP camera. Use IP filtering to help protect your IP camera by filtering access from other IP address set for filtering.
