

Flow

Professional Unblocker for Slow Running Drains - Ready to Use

The Professional Unblocker for Slow Drains **FLOW** is an highly efficient alkaline unblocker to be used in slow drains or for regular maintenance over time. Its action removes soaps, molds, food residues and paper, avoiding the formation of bad smells. It can be used in all types of system, both in metal and with plastic drains.

Instructions: use **FLOW** preferably in dry drains. Pour the product directly in the drain.

After 5 minutes or when the product move downward in the drain, open the water with an abundant **FLOW**. The drain will resume to normally work. In case of water accumulation, stop the **FLOW** to let it drain, then resume abundant rinse.

Use **FLOW** every month to guarantee a perfect efficiency of the drains and the prevention of the formation of bad smells.

FLOW must be used by experienced professionals, provided with the specific personal protective equipments.
