

# HF Generators

It makes us different **“80kW”**

Our high frequency technology assures  
the best image quality in every operating condition  
along with reduced patient dose and  
extended X-ray tube lifetime.

Our generators provide  
the right amount of penetration,  
reducing exposure time and retakes.

Automatic exposure control provides  
precise control single-touch  
anatomical programs available  
for each anatomical region:  
access up to unique program settings.

Touch Screen  
OP Console

- Type : Microprocessor control & Digital display
- Indication meter : kV, mA, mAs, msec, DAP value
- Anatomical mode (APR)
- Applicable Generator : 40/50/65/80kW
- Dimensions : 430 x 330 x 100mm
- Weight : 6kg (approx.)

FnD OP Console

## Specifications

Power	32kW	40kW	50kW		65kW	80kW									
Max mA/kV	400mA/125kV	500mA/125kV	630mA/150kV	800mA/150kV	800mA/150kV	1,000mA/150kV									
Max rating	400mA @ 80kV	500mA @ 80kV	630mA @ 75kV	800mA @ 62kV	800mA @ 80kV	1,000mA @ 80kV									
mAsRange	0.1 – 500mAs		0.1 – 600mAs		0.1 – 800mAs										
Exposure time	0.001 – 6 seconds (81 steps)														
Frequency	40kHz				Max. 300kHz										
Line Voltage	220 VAC, 50/60Hz, Single phase		380VAC, 50/60Hz, Three phase												
PSU	Capacitor bank (option)														
Automatic line compensation	± 15%		± 10%												
Console display	kV, mA, mAs/ msec(digital display, desk top or wall mounted)														
APR	288 APR Standard (Anatomical Programming)
