EVERDIGM DURAWING280

DURAWING280 is a concentric overburden system designed for casing of 340mm diameter hole, specialized through hard formation into bed rock.

The wing bits are enclosed on pocket area making it the most professional & efficient system in the market as it is free from clogging in loose overburden material while it go down to bedrock. When the drilling starts wing bits come out with unique cam sliding mechanism. The key feature of DURAWING280 is the self actuating wing bit system that is not related with unpredictable ground condition.

TECHNICAL SPECIFICATION

PART NAME

NO.	PART NAME	EA	PART NO.
1	Guide Device	1	TBA
2	Pilot Bit	1	TBA
3	Wing Bit	3	TBA
4	Retainer Ring	1	TBA
5	Locking Pin	1	TBA

SPECIFICATION

ITEM	SIZE
Major Body Diameter	300mm
Length	774mm
System Open	340mm
Casing Size	301.7 / 323.9mm
Total Weight (Approx.)	213kg
Hammer Type	SD 10
