

Wedge Flowmeter

Model : SWF

SeoJin Instech Co., Ltd.

Introduction

Wedge flowmeter is designed to be applied to almost any flow condition. Wedge provides a simple, practical solution to both standard and severe service requirements.

The fluid is diverted downward in similar fashion to a segmental orifice but along a sloping wedge shape as opposed to a sharp edge.

Pressure taps are located approximately one diameter upstream and downstream.

This geometry and use of remote seals make these meters suitable for air-entrained liquids, slurry flow, water-laden gases and in general any difficult-to-meter fluid. Specially it is suitable to measure quantity of flow for fluid with high viscosity.

Specification

STANDARD ACCURACY

±0.5% of actual flowrate (After Calibration)

+/-3% of actual flowrate (Before Calibration)

REPEATABILITY

+/- 0.2%

STANDARD BETA RATIOS

0.2~0.7

INSTALLATION PIPING REQUIREMENTS

Front 6~10D / Rear 3D

FLANGE RATING

JIS 10K, 20K, 30K etc.

ANSI(or JPI) 150, 300, 600 etc.

MATERIALS OF CONSTRUCTION INCLUDED

Standard: 304LSS, 316LSS, Carbon Steel

Special materials on request

LINE SIZES AVAILABLE

25A ~ 600A

END FITTINGS

Flanged, threaded, or weld-end standard

Others on request
