

INSIGHT- μ
Microscope for Medical Diagnosis

INSIGHT-μ

Insight – μ is designed for various medical purposes. This microscope provides high-quality optical system with High-Definition resolution and stable illumination at low light levels with LED highlight.

■ Features

- Enhanced optical system for precise diagnosis with 3 steps magnification
- Clear, bright, true color image with an advanced hi-tech microscope
- Using LED illumination, stable, bright and cost-effective
- Convenient design, easy to use
- Equipped with HD camera and 24-inch LCD monitor for high-quality digital video image (optional)

■ Specifications

- | | |
|------------------|--|
| • Objective Lens | f = 250mm |
| • Magnification | 3x, 5x, 8x |
| • Light Source | LED |
| • Dimension | 169(W)X186(D)X218(H)mm |
| • Weight | Including Hand piece micro scope
Approx. 1.5Kg |
| • Binocular Tube | Straight type |
| • Power Supply | 100-264V AC, 47-63Hz
38W (12V DC, 3.4A) power consumption |
| • Beam Splitter | Built-in Light Source |

■ Applications

- Medical diagnosis - Internal medicine, Otolaryngology, Ophthalmology, Pediatrics etc.
