

# Military Gas Mask K10

# K10

## Military & Law enforcement

- K10 is a variant of K5 (Next generation standard issue gas mask for Korea) and so it is not only sharing core technologies but customized to outperform the requirements of NATO Triptych and to be suited to future battlefield environment.
- K10 provides complete protection against the most potent threats such as CBRN agents and Toxic Industrial Chemicals (TIC), ensuring maximized operational capability with continuous comfort.

### Components

### Features

 <p><b>Single visor</b></p> <ul style="list-style-type: none"> <li>· Wide field of vision and with enhanced user recognition</li> <li>· Flexible, scratch and impact resistant</li> <li>· Integration with gun sights and night vision</li> </ul>	 <p><b>Dual canister</b></p> <ul style="list-style-type: none"> <li>· Reduced inhalation resistance in half</li> <li>· Compatible with single CBRN canister with DIN 40 thread</li> <li>· No interference with shooting</li> </ul>
 <p><b>Compatibility</b></p> <ul style="list-style-type: none"> <li>· Compatible with any military helmets</li> <li>· Improved integration with corrective vision, voice amplifier or communication sys.</li> </ul>	 <p><b>Hydration</b></p> <ul style="list-style-type: none"> <li>· Self-locking high flow drinking system</li> <li>· Easy operation with lever</li> <li>· Fit to canteen &amp; back worn hydration system</li> </ul>

### Performance

Protection against CBRN & anti-riot agents			
Breathing resistance Face-piece & Canister	30L/min	50L/min	80L/min
Inhalation	10mm WG	17mm WG	27mm WG
Exhalation	5mm WG	8mm WG	11mm WG

Certification : NATO Triptych D103, assessed by ProQares, TNO, Holland
