

Protective Mask

SCA119FD

- SCA119FD Fire Escape Hood protects wearer to breathe safely and escape to a hazard free area.
- SCA119FD protects against a wide range of toxic fire-related gases, vapours and particles.
- Thanks to its dual canisters, the user can breathe more comfortably than typical fire escape hood with single canister, especially in case a fast evacuation is required.

Components

BASIC COMPONENTS

Mask with filter

Carrying bag

Carton box

Features

Dual canisters

- Reduced inhalation resistance in half
- Offering psychological stability and fast evacuation thanks to comfortable breathing

Protection against fire gases

- Fully meets the requirement of EN443
- ※ Tested with 6 fire gases (4 from EN403:2004 and plus 2 gases)

Light weight and compact design

- Space-saving compact carton box
- Easy to carry without interruption

Easy don & doff

- Adopted self-sealing neck cover
- Ready to use in 10s without training
- 1 size fits all

Specification

Data sheet	SCA119FD	
Fire-related gases	Propenal	> 15min
	Hydrogen Chloride	> 15min
	Hydrogen Cyanide	> 15min
