

Chemical Protective Suit

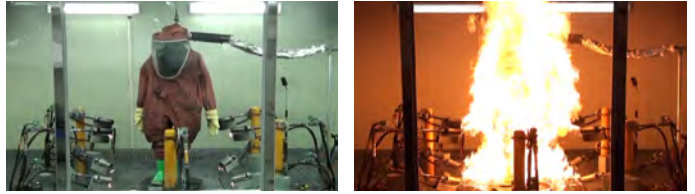

SCA18002N

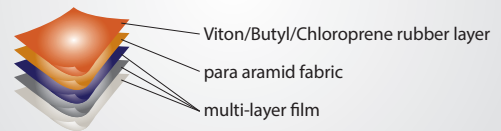

- SCA18002N, totally encapsulating design suit with visor and hump, and breathing apparatus worn inside of the protective suit, supplies the maximum level of protection against a wide range of hazardous chemical exposures including warfare agents.
- SCA18002N is designed to meet NFPA 1991:2005 edition with optional performance requirements:
 - Chemical flash fire performance requirements
 - Liquefied gas protection performance requirements

Flash fire test

Multi-layer fabric

Visor

Chemical and impact resistant large visor

Ventilation

Adjustable ventilation system distributes air from SCBA to arm/sleeves, legs and over visor.

Outside

Inside

Glove attachment system

The gloves are attached with the Bayonet ring system for quick and easy exchange. For extra safety the ring system is fitted with a locking pin.

Zipper

A highly chemical resistant zipper due to the combination of rubber and an additional barrier laminate.

Footwear

NFPA approved OnGuard Hazmax® boots

Certification: NFPA 1991:2005
