

Thermal Fuse : SW-1 Series

Introduction

The thermal fuse, SW-1 Series, uses a thermally stable insulation type organic material as a fusible element and operates by spring action. SW-1 Series is compact, high current capacity, sensitive to ambient temperature and single operation over-temperature protection for household, resistive heating elements, business machines like refrigerator, oven boiling pot, iron etc.

Technical range

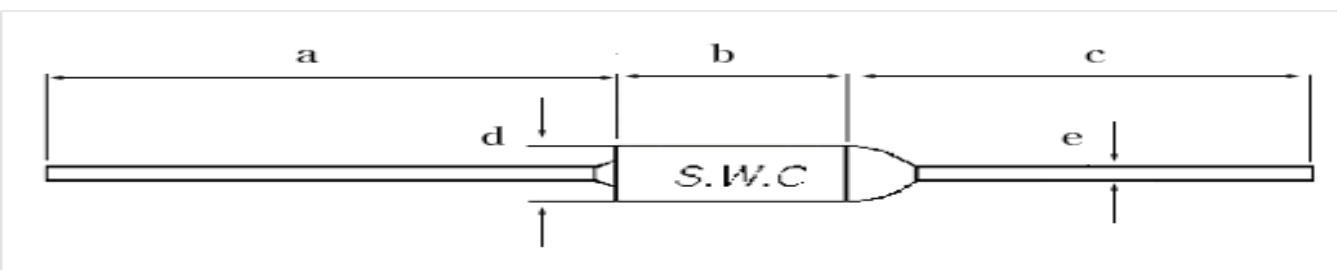

Rated voltage : AC250V / AC150V

Rated current : 10A / 15A

Interrupting current : 15A at AC250V

Reference temp. range : 72°C ~ 240°C
