

STPA (Single substrate Transfer type Pol. Attachment & Autoclave) SYSTEM

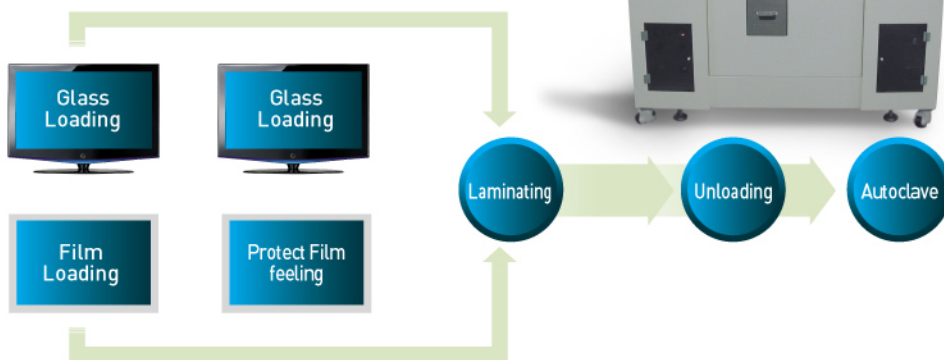

枚葉式 偏光板貼付 加圧 脱泡 装置

This STPA System is combined Polarizing film Attachment with Autoclave. Also it was designed to operate automatically by feeding one by one. It will give a good opportunity to decrease the working force and to enhance the performance.

→ Product Feature

- 01 Tact time : Tact time decreases by 1/3 than other technology (50 inches = 20sec)
- 02 Set-up : Can use space effectively
- 03 Transportation :
 - Conveyance of material has been simplified compared with other technology.
 - Potential damage would be diminished.
 - Save investment cost
 - Not necessary other transport device to move the material
- 04 Autoclave : Not necessary the chamber type of Autoclave.
- 05 Maintenance : Easy and save the cost by simplifying
