

In-Line ENDSEAL SYSTEM

イーン ラーイン 加圧 封止 システム

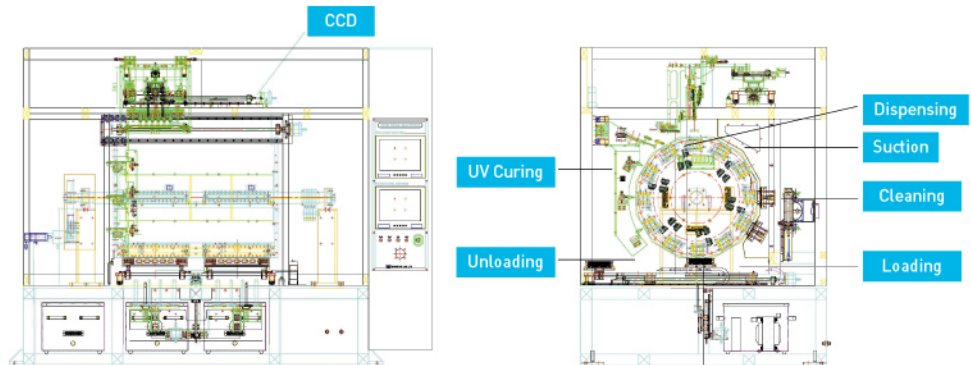

This equipment was invented for the purpose of sealing the LCD Panel filled with LC. It was composed of pressurizing, cleaning, dispensing and UV curing. This process operates automatically by loading LCD Panel one by one.

Product Feature

- 01 In-Line system of End-Seal process
- 02 Fast Tact Time by Rotating system
- 03 Simplification of process
- 04 Utility consumption decreases.
- 05 Easy operation
- 06 Automatic alignment by CCD camera
