

SAFE DEPOSIT BOXES CAI Series

[CAI/DCAI]

[CAI 565]

Combination of electronic and biometric systems!

Now, you can experience the ultimate safe technology. CAI series are the new-concept safe deposit box with inside hinge employing the password system, fingerprint recognition system, hand vascular pattern recognition system, ace recognition system, and all kinds of electronic and biometric recognition systems.

Now, you can experience the ultimate safe technology

Features

- Various models and excellent design :

Various configurations are available its external appearance is outstanding with no seam and highest defined in shape.

- Convenient installation :

Each unit is complete assembly type so that it is easy to add more units and move to anywhere as you want

- Reinforced safety :

The master key function is replaced by electronic/biometric system to reinforce and maintain private security.

- Convenient for use :

The specially manufactured electronic key has auxiliary master key function in case of interruption of electric power or emergency.

- Providing audit trail :

The CAI software program provided records customer's event, reference and biometric authorization information.

Specifications

- Door :

Its external appearance is very beautiful due to its aluminum alloy clad with hair-lined finish stainless steel plate.

- Lock :

SHINJIN own developed electronic lock which has two recognition function.

- 1st step : Electronic recognition or Biometric system
- 2nd step : Customer key

Kinds of Electronic recognition & Biometric system

- Password system :

A user will select and register 4 to 8 encrypted numbers at kiosk. Then, if he/she wants to use the safe deposit box, he/she should enter the password, which will be verified against the registered one.

- Fingerprint recognition system :

This system based on the fact that each person has a unique fingerprint is the firstly introduced one out of various biometric recognition technologies.

- Hand vascular pattern recognition system :

Hand vascular images saved by the infrared system are used to analyze the subcutaneous vascular pattern according to high-tech algorithm. This is a new system for verification of a person's identity.

- Face recognition system :

CCD camera is used to collect facial patterns and characteristics of individuals. These data on facial patterns and characteristics are saved as database, which then is used to recognize and verify a person's identity according to the analysis algorithm.

* Password system is used in connection with other biometric recognition system.

[CAI565 series]

CAI Series

Intended Use & Applicable Fields

- Banks, Hotels, Golf Clubs, Sports Clubs, Resorts etc
- Installable inside of fireproof safe
- Any places where valuable should be kept

Option

- **DCAI series** : The unit depth is 400mm so it is very useful in installing at limited space
- **CAI565 series** : The unit height is 565mm so it is very convenient in installing at lower ceiling.

Dimension

[CAI] unit size: W 922mm X H400mm X D610mm(6H = H800mm)

Model No	CAI -15	CAI -9	CAI -6	CAI -3	CAI -6H
