Fire proof safe

SHIN JIN's fire resistant safe, GB Series is excellent for home and office by enhanced design and superb quality.

With approved quality by SP and KS, GB series is perfect to protect various personal belongs, valuables, important documents from unexpected fire and breaking.

Especially, GB series is tested by well-known SP (Swedish national testing and research institute) in accordance with NF FIRE 017 and have two kinds of P mark - NT FIRE 017 60min paper and NT FIRE 017 90min paper for home safe and NT FIRE017 90min paper for office safe.

We use specially formulated bubble concrete to provide best insulation against intense heat.

Fire Endurance Test

## SHINJIN SAFE-TECH

### Fire Endurance Test

#### STEP 1

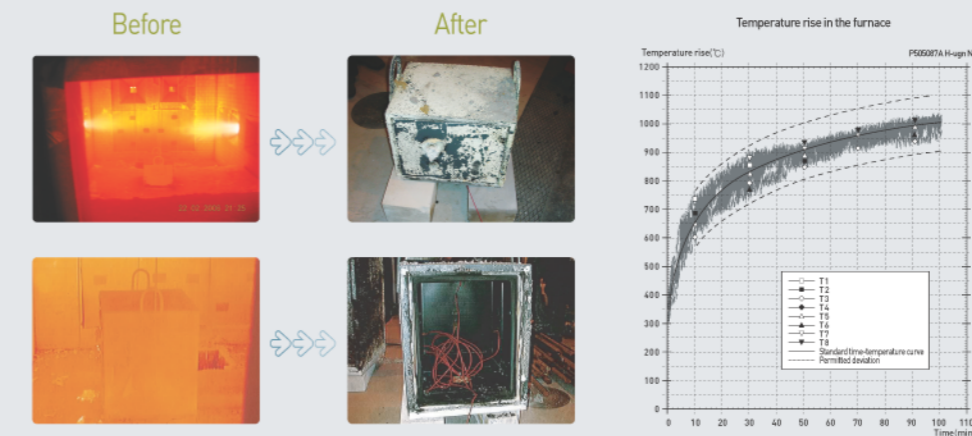

Test safe is placed in the furnace. The temperature inside of the safe are measured with six thermocouples.

#### STEP 2

The safe is heated up to 1010 ° in the furnace during 60 minutes or 90 minutes according to level of certificate. The maximum allowable temperature inside of safe is 150 °

#### STEP 3

After heating, the test safe is examined if the inside things are protected safely without burn-out.
