

RDML

RUNWAY DISTANCE MARKER LIGHT

RDML : RUNWAY DISTANCE MARKER LIGHT

Compliance with standards

ICAO : Annex14 Para 5.4

FAA : AC 150/5345-44(Korean Standard)

Features

- Compliance with luminance and colour temperature requirements for day or night use
- Designed for operations in RVR less than 800 m
- Halogen lamp with light transmission tube adapted to all climates (from -40°C to +55°C)
- Distortion-free flat legend panels provide optimal pilot visibility under all weather conditions
- Modular construction allows for virtually unlimited double and single face message lengths
- Legend and blank panels easily removable and interchangeable
- Operate under wind velocities up to 200km/h
- Destructive impact test performed according to ICAO requirements
- Lamp replacement without tools and access from removable cap on the side panel of the sign

Drawing & Installation

Unit: mm

Ordering Code

R D M L - L
